

Box internet & TV Orange

Box internet

Decoder ORANGE TV

- The box is operational when all 3 lights are on.
- Wifi is then available.
- When searching for wifi networks, connect to liveboxSXM19 with the password enjoytheview.

If the LEDs are flashing, an update may be in progress, so please be patient.

The Orange decoder offers a wide range of TV channels. It is usually in standby mode. You can switch it on using the elongated "Orange" remote control..

TV remote control

If you switch on the television without first switching on the TV decoder, the decoder will search for the source.

- Either switch on the TV set-top box and the HDMI1 source will automatically be found.
- Or press the button and you can  select a connected TV application.

Streaming platforms such as Netflix, Amazon, Prime and others are to be used with your personal subscriptions.

You will need to log in to access them.

Orange decoder remote control

If you switch on the TV set-top box after browsing the TV applications, you will need to select the HDMI1 source.

- TV offers a variety of French and foreign channels. You navigate through the channels using the following buttons 
- You can also access the Netflix login on the Orange TV menu.
